

## ATF PROTECTION

### PROFESSIONAL ATF BOOSTER

#### DESCRIPTION

ATF PROTECTION is an ATF oil additive for automatic transmissions. Improves thermal and oxidation stability of the hydraulic fluid for optimal performance.

#### CHARACTERISTICS

- Smoother overall operation and smoother shifting.
- Significantly reduces friction and wear between all internal components.
- Prevents leakage by maintaining the seals.
- Protects the oil from oxidation and keeps the transmission internally clean.
- Prevents overheating.

#### APPLICATION

Suitable for all OEM applied ATF oils from automatic, CVT and DSG transmission systems. Optimal results in passenger cars, trucks and industrial engines.

**The capacity (250 ml) is sufficient for a maximum of 8 litres of oil.**

Contents: 12 x 250 ml/carton
