

## SHOCK RELEASE SPRAY

HIGH-QUALITY PENETRATION OIL WITH COLD SHOCK

### DISCRIPTION

Powerful creep oil for loosening non-destructive rust, corrosion and stuck parts. The shock freezing effect (-40°C) creates a thermal load and microscopic cracks in the rust surface. This allows the lubricating components to penetrate as deeply as possible into the stuck parts. The ceramic and PTFE particles provide excellent lubrication and corrosion protection.

### CHARACTERISTICS

- Provides easier and faster disassembly of severely stuck parts.
- Excellent penetration properties.
- Dissolves dirt and rust.
- Is fully water resistant and drifts dirt particles.
- Lubricates and reduces friction between moving parts.
- Prevents electrical problems.
- Silicone free.

### APPLICATION

The excellent universal properties of SHOCK RELEASE SPRAY ensure that the product can be used in many areas.

### INSTRUCTIONS FOR USE

1. Spray from a short distance on the parts to be disassembled.
2. Spray until the seized parts have cooled down sufficiently.
3. Allow the product to soak in for a few minutes.

TIPS - Use the spray several times in case of severe rust formation for optimal results.

Contents: 12x 500 ml/carton
