

## RADIATOR FLUSH

### ADVANCED COOLING SYSTEM CLEANER

#### DISCRIPTION

High-tech blend of inorganic acids and inhibitors developed to remove rust, limescale, oil residues and deposits.

#### CHARACTERISTICS

- Removes limescale
- Prevents rust, deposits and greasy residues
- Excellent results with all types of coolant, including OAT coolant
- Safe for rubber hoses, seals and all metals in the cooling system
- Restores optimal operation of the cooling system

#### APPLICATION

Recommended for "water" cooled systems of all gasoline and diesel engines.

#### OPERATING INSTRUCTIONS

Switch the heater to the warmest position and drain the cooling system. Once empty, fill the cooling system with RADIATOR FLUSH and add water. The content of 250 ml is sufficient for 4 to 10 liters of coolant. Start the engine and let it idle for about 20 minutes. Turn off the engine and let it cool down and re-run the system. While the system remains open, rinse with water until it is clear. Close the system and fill it with fresh coolant.

Contents: 12 x 400 ml/carton
