

ENGINE FLUSH

PROFESSIONAL INTERNAL ENGINE CLEANER

DISCRIPTION

Highly concentrated motor oil cleaner without solvents, so that the lubricating film is not affected. The product has been specially developed to be added to the old engine oil before the oil change in order to eliminate the largest contaminants in the engine. Optimum results are obtained by adding the ENGINE FLUSH and driving the vehicle for approximately 50 - 100 km.

CHARACTERISTICS

- Cleans the entire lubrication circuit and unlocks hydraulic tappets, variable valve timers and piston rings.
- Improves oil circulation.
- Removes deposits on the piston rings.
- Prevents contamination of fresh oil and thus extends the service life of the fresh engine oil.
- Higher engine efficiency (better compression ratio).
- Neutralizes combustion acids.
- Contains no solvents. No risk of engine damage.

APPLICATION

Suitable for all petrol and diesel engines with mineral and synthetic engine oils.

The content (250 ml) is sufficient for 3 to 6 liters of oil.

To be used with every oil change of the engine oil.

Contents: 12 x 250 ml/carton
