

ATF FLUSH

INTERNAL TRANSMISSION CLEANER

DESCRIPTION

Highly concentrated transmission cleaner without solvents, so that the lubricating film is not affected. The product has been specially developed to add oil to the old transmission before the oil change to clean the transmission internally.

CHARACTERISTICS

- Cleans safely and thoroughly the entire transmission circuit.
- Does not contain any solvents.
- No risk of engine damage.
- Reduces transmission noise.
- Prevents contamination of the fresh oil.
- Harmless to seals, friction components and metals.

APPLICATION

For all types of automatic and manual transmissions. Ideal for use in cleaning devices for automatic transmissions.

INSTRUCTIONS FOR USE

Add 300ml ATF Flush per 8 litres of oil. Make a test drive of at least 25 km or run the engine on a lift for about 30 minutes. Shift regularly to the different gear positions (D/P/N/R). Change the transmission oil and the oil filter. Also suitable for PDK, DSG, CVT or manual transmissions.

The capacity (300 ml) is sufficient for a maximum of 8 litres of oil.

Contents: 12 x 300 ml/carton
