

ZINC SPRAY

HIGH-QUALITY ZINC SPRAY

DESCRIPTION

Provides high purity, long-term weatherproof protection. Consists of 98 - 99 % pure zinc. The zinc gives the metal surface a cathodic protection against rust up to a temperature of +500°C. Optimal corrosion protection after welding and assembly.

CHARACTERISTICS

- Protects against oxidation.
- Fast drying
- Easy to use
- Forms a reliable protective layer
- Universal application
- Cathodic protection
- Resistant to high temperatures (up to 500°C)
- Contains more than 98 % zinc (Zn)

APPLICATION

Zinc Spray is a very effective corrosion protection for new coatings or as a primer. The product is dust dry after 15 minutes. Completely dry and paintable after 12-24 hours. Suitable for protection of welding points on galvanic parts.

Contents: 12x 400 ml/carton
